TRAINING COURSE

AI FOR HUMAN RIGHTS PROFESSIONALS

Artificial Intelligence for Monitoring, Reporting and Governance

2-4 DECEMBER 2026

GENEVA | IN-PERSON COURSE

Overview

Artificial Intelligence (AI) and Machine Learning (ML) are transforming how data is collected, analysed and used in policymaking. For human rights professionals, understanding and responsibly applying these technologies is increasingly essential.

Drawing on a network of AI and human rights experts, this training, organised in partnership with the Frierich Naumann Foundation, and the International Telecommunication Union (ITU), will offer both theoretical and practical insights into how AI can enhance human rights monitoring, support evidence-based policymaking and streamline Sustainable Development Goal (SDG) tracking.

Participants will explore AI's potential to improve data collection, cross-referencing, predictive analysis and reporting, while also critically engaging with ethical and governance considerations such as bias, accountability, transparency and data protection.

Key Areas Covered

- Key AI and ML concepts and their relevance for human rights monitoring, reporting and SDG tracking
- AI-driven tools for data collection, analysis and reporting, including practical applications for evidence-based policymaking
- Human rights data management, structured data and digital tools used to monitor recommendations and progress
- Benefits and risks of AI applications in human rights governance, including bias, transparency, accountability and data protection
- Strategies to integrate AI solutions into human rights monitoring systems at national, regional and international levels
- Cross-sector collaboration with AI experts, digital policymakers and practitioners on responsible AI deployment

Audience

This training course is designed for human rights professionals, including diplomats, policymakers and representatives of international organisations, governments, national human rights institutions and civil society who seek to integrate AI into their work effectively and responsibly. The language of instruction will be English.
The training will be delivered free of charge to the selected participants.

Practical Information

Location: Geneva

Format: In person

Dates: 2-4 December 2026

Deadline to apply: 04/11/2026

Group size: Approximately 25 participants

Lead facilitators: GHRH, ITU and invited experts on AI and human rights
